

Please reject petition 04-160!! I'm a huge satellite radio supporter because it offers such a huge variety of quality programming that you cannot find on local radio stations today. Local stations subject you to the same redundant material 24-7 without any variety. XM radio's traffic and weather stations are a great service to me and my ability to access local information at any given time. To receive such information at a local level means having to wait through hours of nonsense to get the substance. I pay taxes and pay my XM fees to be able to enjoy ALL that they offer without limits. I shouldn't have to pay to have someone tell me what I can and can't listen to. XM radio offers me the variety and substance that I need to enjoy and maneuver throughout each day. Please protect our satellite radio!
